PROFESSIONAL SUMMARY

Final-year Information Technology student with a minor in Mass Media (BMM). I specialize in bridging the gap between technical logic and business requirements. A disciplined learner committed to consistent practice, physical fitness, and mastering the IT industry through real-world problem-solving and adaptive growth. I define my brand by the ability to learn from mistakes and remain consistent under pressure.

EDUCATION

Bachelor of Science in Information Technology

2023-2026

St. Xavier's College (Autonomous), Mumbai

- **CGPA:** 8.10/10
- **Minor:** Bachelor of Mass Media (BMM)
- **Key Coursework:** Python, DBMS, Web & Mobile Design, Java, Advertising, Social Media, and Principles of Design, Data Analytics
- **Certifications:** German A1 Level

PROFESSIONAL EXPERIENCE

Development Intern

April 2025 – July 2025

Tofu Digital, Mumbai

- **FULL-STACK DEVELOPMENT:** ENGINEERED A HEALTHCARE WEB APPLICATION CONNECTING VENDORS AND CLIENTS FOR LAB SERVICES USING FLUTTER (FRONTEND) AND PYTHON FLASK (BACKEND).
- **DATA ARCHITECTURE:** MANAGED DATABASES WITH POSTGRESQL AND DEPLOYED THE APPLICATION VIA FIREBASE AND RENDER.
- **VERSION CONTROL:** USING GITHUB FOR CODE REVIEWS AND ITERATIVE DEPLOYMENT.

PROJECTS

WayPal: Bluetooth Beacon Navigation (Final Year Project)

- Developed an indoor navigation system using ESP-32 Beacons to assist movement within a college campus.
- Presented the prototype at a technical exhibition, demonstrating the intersection of IoT and Embedded Systems.

Personal Brand & Portfolio Website | mendonzajoshua.github.io/Portfolio

- Designed and deployed a responsive personal portfolio to showcase academic projects and technical skills.
- **Tech Stack:** Built using HTML5, CSS3, and JavaScript, with PHP integration for backend logic.
- **Roadmap:** Currently migrating the architecture to the React framework to enhance UI/UX and implement component-based design for scalability.

GitHub Influencer Marketing Plan (BMM Minor)

- Strategized a digital marketing campaign for GitHub, merging technical brand awareness with mass media principles and influencer trends.

Movie Success Prediction (Big Data)

- Utilized Python and Google Colab to preprocess large datasets and build a predictive model for film success based on historical trends.

Modern Operating Systems, Network Security, Embedded System

I In my main IT course, what I liked was, in these subjects was, our professor was really good and he used to give us practical based projects, not just theory exams. So, I can talk a bit about it. Like, I did create a few good project like simple socket login system, simulated microcontollers on TinkerCad, Go to know about OS and downloaded Ubuntu OS on my Personal PC, I don't remember the projects I did in this course.

TECHNICAL TOOLKIT

- **Programming:** Python, SQL, Dart, HTML/CSS/JS, Arduino (C++).
- **Data & Frameworks:** MongoDB, PostgreSQL, Flask, Flutter, Google Colab.
- **Creative Suite:** Affinity and Canva
- **Linguistic Proficiencies:** English (Native), French (B1), German (A1), Hindi, Marathi.

PERSONAL BRAND & DISCIPLINE

- **Physical Discipline:** Committed to a 4-day/week muscle-building and fitness regimen; focused on long-term health and dietary consistency.
- **Digital Wellness:** Actively practice digital minimalism (deactivated Instagram) to focus on deep work and professional platforms like LinkedIn and X.
- **Operational Standard:** Dedicated to maintaining a tidy, organized living and working environment to enhance mental clarity and focus.
